RE: OSHA

As promised in my telex to you of yesterday, attached is a copy of Bradley Walls' report on his meeting with the Department of Labor lawyer's in Washington last Thursday. The letter spells out quite clearly what we can and cannot do under the law with regard to the development of the Occupational Standard on Asbestos. I would recommend that you read this letter most carefully, especially the final section which deals with the types of presentations that would be of most value at the March 14 public hearing.

We request that this letter be treated confidentially. It would be most embarrassing if the "legal game plan" outlined in the letter were to fall into the wrong hands.

Sincerely,

M. M. Swetonic
