Dr. Marvin Kushner
Chairman of the Department of Pathology
State University of New York
South Campus Health Science Center
Building 6, Room 133
Stony Brook, New York 11790

Dear Dr. Kushner:

Mr. Fleming has requested that you receive all pertinent information which is testified to in the Department of Labor hearings relating to Vinyl Chloride. As you know, the hearing began on June 22 and continued through June 28. They will resume again on July 8 and will more than likely continue throughout that week.

Though we are receiving daily transcripts of the hearings, the testimony is quite voluminous (over 11,000 pages to date) and therefore I have been attempting to copy only those portions which you may find of interest. I am enclosing the following portions of the transcript:

1. The direct testimony of Dr. Kotin on behalf of Air Products and Chemicals, Inc.;
2. The cross-examination of Dr. Kotin; and
3. The direct testimony and the cross-examination of three physicians from Dow Chemical Company regarding Dow's employees exposed to Vinyl Chloride.

There are other portions of the testimony which I believe you will find informative, and these will follow at a later date.

If you should have any questions relating to the hearings or any other matter for which you believe I may be helpful, please feel free to write or call.

With best regards, I remain

Very truly yours,

Joseph T. Sebastianelli
Attorney
