Subject: Production Materials and Components Containing Asbestos

In our communication of March 27, 1980, we informed you that at some later date Purchasing activities would likely be requested to contact suppliers to obtain certain information concerning purchased production materials or components believed to contain asbestos.

Specific information required by the Task Force on Carcinogens in the Work Place is described in the attached letter and lists received from Engineering and Research Staff on May 7, 1980.

The lists identify ES material specifications and basic part numbers by using division. Please address those items for which you have purchasing responsibility and arrange to obtain the required information from the supplier. Purchasing activities not affected should regard this letter as information only.

In recognition of the short completion timing requested, we suggest you forward the supplier data obtained directly to Mr. K. B. Termaat, Engineering and Research Staff, Parklane Towers East, Suite 305. We would appreciate a copy of these transmittals.

R. M. Dierkes
