Attention of Mr. F. A. Barker, Chief Chemist

Dear Mr. Barker:

Thank you for your letter of May 30 relative to your Type 544-B Megohm Bridge. Our records indicate that you are using this instrument with the Type 544-P2 90 volt Power Supply. To make the change in this instrument to a 500-volt Power Supply it will be necessary only to purchase the Type 544-P3 Power Supply as described in the enclosed catalog pages. This new power supply is used in place of your present one. Our formal quotation summarizing price and delivery information is enclosed for your convenience.

We are sorry that we will not have additional 500-volt Power Supplies until early November.

Very truly yours,

Myron T. Smith
Sales Engineering Manager
