

August 22, 1951

Mr. Manfred Bowditch
Director Health and Safety
Lead Industrial Association
420 Lexington Avenue
New York 17, New York

My dear Mr. Bowditch:-

Enclosed is information I promised
in letter of August 17, 1951. I reviewed the records
of the cases of lead poisoning treated at the
Children's and Cincinnati General Hospitals as com-
piled by Dr. Smith. I am sending pertinent facts on
those patients who died this year.

At present we have no home checkup. All
of these homes are in the basin of the city. Houses
have received over period of many years many coats of
paint.

I hope this information is helpful.

Sincerely yours,

Robert H. Kotte
