Phone: (205) 236-6381

July 5, 1972

Mr. John C. White, Director
Environmental Protection Agency
1421 Peachtree Street, N.E.
Atlanta, Georgia 30309

Dear Sir:

In November 1971, Monsanto personnel met with you, your staff, and Mr. Crockett of the Alabama Water Improvement Commission, to discuss the PCB abatement program for the Anniston Plant. During this discussion, a commitment was made to have the problem resolved by July 1, 1972.

As you will recall I informed you in early 1972 that we would not follow the original plan discussed with you in November but would cease all PCB related manufacturing operations by mid-year.

This memo is to inform you that effective May 1, 1972 all PCB related manufacturing operations at Monsanto's Anniston, Alabama plant were terminated.

Yours very truly,

G. L. Jessee
Plant Manager
