Subject: REMINDER AND CALL IN DETAILS: New HEI Atlanta Accountability Study to Be released April 19, 2018!
Attachments: HEI Statement Russell Research Report 195.pdf

Dear HEI Sponsors:

I write to follow up on the advance news that HEI will be releasing the latest of HEI's Accountability studies at www.healtheffects.org on April 19, 2018. After a number of national and state air pollution control measures taken in and around Atlanta, Dr. Armistead (Ted) Russell and colleagues from Georgia Institute of Technology and Emory University examined whether such regulations targeting power plants and mobile sources were effective in reducing pollutant emissions, improving air quality, and ultimately improving health. Their comprehensive report, *Impacts of Regulations on Air Quality and Emergency Department Visits in the Atlanta Metropolitan Area, 1999–2013*, finds interesting and valuable results of what these measures accomplished; I have also attached an advance copy of the HEI Statement summarizing the study and its results.

As I noted last week, we are planning a webinar with Dr. Russell at 1 PM on the 19th. The webinar link and call in details are below. Though we should have plenty of capacity for the session, it would help if you could let Lindy Raso, our Executive Assistant, know you plan to attend at lraso@healtheffects.org so we can look forward to welcoming you!

Attendee access link:

Ex. 6

Event passcode: **Ex. 6**

Phone Access (separate from the webinar):

- Phone number (US and Canada): **Ex. 6**
- Passcode: **Ex. 6**

Several of you have also asked if it is OK to forward this information on to your interested colleagues – and that is fine and welcome...

We look forward to sharing these important new results with you this week – and to seeing many of you at the HEI Annual Conference in Chicago on April 29th!

And thanks for your continuing interest in and support of HEI's work!

Best
Dan
