August 3, 1965

Mr. W. F. Justice
Owens-Corning Fiberglas Corporation
Berlin, New Jersey

Dear Mr. Justice:

We enclose herewith revised price lists on Amosite (A1A9), and Blue Crocidolite Asbestos (B1A9), both effective August 15, 1965.

The revised prices reflect a ten percent increase in ocean freight rates, which became effective August 1, 1963 (heretofore absorbed by us), and an additional ten percent increase in ocean freight effective July 1, 1965. The two increases together amount to approximately $5 per ton.

Aside from the increases for freight there is a modest adjustment in the price level of Amosite Grades GK, S33, A10 and DCW to reflect increases in mining and milling costs of these shorter grades, which it is necessary to cover at this time.

Nothwithstanding these changes, we call your attention to the relatively stable pricing of Amosite and Blue Fibre for a period of more than ten years during which there have been minor adjustments, but no major or general increase in price levels. Thanks to your support, and to the broadening usage of both Amosite and Blue Fibre, we have had a steady increase in mining output, and to a large extent this has made it possible to offset some increases in mining and transportation costs.

It is our intention to do all possible to continue to maintain the highest degree of price stability in our offerings of Amosite and Blue Asbestos. We do not anticipate the necessity of major price changes in the foreseeable future.

Very truly yours,

NORTH AMERICAN ASBESTOS CORPORATION
