WITTENOOM CINEMA LIGHTING SPECIFICATIONS

The wiring to be arranged for seven (7) lights down each side of the gardens. These lights will be 8 feet from ground level and each will be a watertight electric fitting, capable of carrying a 100 watt lamp, viz., Rowco List No. 57 complete with well glasses.

The installation to be carried out in 5/8 inch galvanised conduit and fittings, and to be securely fixed to timber on top of walls. The wiring to be arranged for two (2) circuits and to be wired in 3.029 PVC cable of 250 volt grade.

The wiring to be controlled by two (2) 10 amp switches, clearly marked on the switchboard in the Bio Box, and the two (2) circuits to be on two (2) independent 30 amp fuses.

All work will comply with the Public Buildings Electrical Regulations.
