Dear Dr. McConnell:

Re: Industrial Hygiene Survey
Johns-Manville Canadian Locations

Mr. Lindell, our Mines Manager, has advised me that they have encountered some difficulty in maintaining negative pressure in the new dust shed and additional engineering modifications will have to be completed before it is functioning effectively.

He has suggested that the Asbestos Mines' survey be postponed until the week of February 26. Since we desire surveys to be made also at the Munro, Ontario Mine and the Asbestos Factory, the scheduling for these can be adjusted either before or after the Asbestos Mines' survey in whatever manner will best suit your convenience. I would estimate that the survey at Munro and Asbestos Factory would take from two to three days each.

Yours very truly,

H. M. JACKSON
Safety Engineer
