Safety Personnel

We have established a new log for hazardous material sampling (copy attached). Any sampling done at your site involving potential exposure to Construction Division or contractors' employees performing work on contracts administered by the Division will be entered on this log and submitted to the Safety Office with your Monthly Fire and Safety Data Log. Our intent is to maintain sampling records for 30 years. You have the option of sending us the record of your sampling when you get it or we will get your records when the site closes out by including a statement in the Construction Division "HOW" that requires this information be sent to the Safety Office.

If you have any questions concerning the sampling result recap or the Material Sampling Log, please let me know.

CONSTRUCTION DIVISION

J. W. Iwert
Division Safety Engineer
