

We recently sent you information about our latest free report, **PFAS Regulatory Developments: News and insight from around the world**. The report features sample content from our award-winning content team and is available to download, exclusively for Chemical Watch members.

GET REPORT NOW

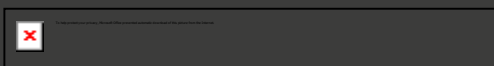

- California's 2025 ban on PFAS-containing cosmetics;
- Unep's programme to reduce hazardous chemicals in the textiles industry;
- Japan's new requirements for export of PFOA and decaBDE; and
- how the US EPA has fired a 'warning shot' on the enforcement of PFAS requirements.

1

As well as immediate access to the report, signing up to free membership also includes other benefits, including three free article credits each month, a selection of reports and guides, our weekly newsletter and free webinars.

Kind regards,

Global Managing Editor
