

1 Ford Exhibit 185, Your Honor.

2 THE COURT: It will be admitted in
3 evidence.

4 (Whereupon, Plaintiffs' Exhibit Number Ford
5 185 was received into evidence.)

6 MR. SMITH: This is a retyped version from
7 our office.

8 April 14, 1975, by Mr. Gealer of Ford,
9 scientific research staff. Subject is exposure of
10 brake maintenance shop workers to brake dust.

11 On April 11, 1975, I received a telephone
12 call from Professor Irving J. Selikoff, Mount Sinai
13 regarding their investigation of possible health
14 hazards associated with respirable particles of
15 asbestos and other substances to which workers in
16 brake maintenance shops may be exposed.

17 He indicated that their examination of brake
18 shop workers is turning up some disturbing findings
19 relative to health effects (he didn't elaborate) and
20 that some physicians out West had found brake shop
21 workers well represented among lung cancer cases.
