TO : Louis Decker

The SHAC Committee has appointed you to the 1976 Office Safety Committee. This is a new committee, designed to increase participation and involvement of office personnel in our plant safety effort. The committee has selected you based on your interest in safety matters and your ability to contribute to development of an effective program for office employees.

Dick McBride has been selected as Chairman of this committee with other members being Marjorie Grady, Juanita Hicks, and Jim Sheehan. You will serve as the link to Loss Prevention Department.

You will have a particular challenge, as well as a unique opportunity, in being appointed to the first Texas City Office Safety Committee. This assignment will enable you to establish a pattern for making the Office Safety Committee an integral part of our Plant Safety Program.

Recommendations made by an Office Safety "Task Force" last fall will be available to assist you in formulating your program.

Arnold Glass and I will plan to meet with the committee within the next month to discuss how your group can fit in with our plant safety effort.

Harold Lacy
H. M. Lacy, Chairman
SHAC Committee
