DATE: March 1933

DOC#: USG096

DOCUMENT DESCRIPTION: 1933 Letter to operating department regarding paper on dust and its relation to operations

UNITED STATES GYPSUM CO.

JUN 13 1933

SUBJECT

Dust and Its Relation to Our Operations.

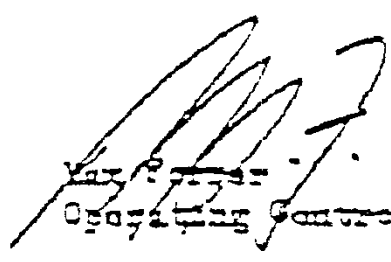

CHICAGO - March 2, 1933

Mr. F. J. Reinberg,
Works Manager,
Detroit MILL.

We are attaching hereto an excellent paper on the subject of "Dust and Its Relation to our Operations" which Mr. J. S. Offutt prepared for presentation at the recent operating convention.

The problem of dust and its control is becoming of continually increasing importance. Many states have legislation along this line, which places definite limitations upon us, under which we must operate. We suggest that you study this paper carefully in relation to the conditions at your plant.

If you have any questions we shall be glad to have you contact us.

V. E. Palmer
Operating General Manager

WEL

This letter sent to all plants and warehouses in the Operating Department, including Canadian Mills and the Marine Department with copies to each Production Manager, Mr. H. B. Palmer and Mr. J. S. Offutt.
