SUBJECT DE SOTO CHEMICALS

REFERENCE

TO C P Farley - St Louis

DeSoto Chemicals (Canada) are having difficulty replacing AROCLOR 1254, in that their technical people in the U.S. at Sunnyborn, Belleville, N.J., are still getting 1254 while the supply has run out up here and the U.S. company doesn't seem to appreciate the gravity of the situation.

In desperation over the lack of intra-company dialogue, they have requested us to advise them as to what Monsanto U.S. is doing with DeSoto stateside, in order that they ensure that their replacement program here goes in a similar direction.

Please let me know what has been done down there.
