

1 so severe that he had to be hospitalized?

2 A Yes.

3 Q Now, there is an indication under physical
4 examination of his height that I have yellowed in.

5 A Yes.

6 Q What was his weight at that time?

7 A 174 pounds.

8 Q So there was a drop in weight from December
9 of -- October of 1992 to January of 1993?

10 A About 10 pounds, if I am not mistaken.

11 Q Then it also says under physical exam there
12 was a limitation to chest wall expansion with
13 inspirations, greater expansion on the right than
14 left.

15 What does that mean and what is it referring
16 to?

17 A It means when you listen with your
18 stethoscope and you have the patient take a deep
19 breath, you look for symmetry of expansion and expect
20 the lungs and hear breath sounds as the lungs expand
21 on both sides.
