We have ordered one-half carload of the Nicosat #13 Lb. Base Felt to produce the subject material.

Please review my memo of January 14, 1972 and set up a revised standard on this material.

Mr. Plummer has ordered this material 2-1-72 so we can run it while we are in a relatively slack season and Dry Felt is in short supply.

It is imperative that we run this material as soon as possible because at a later date machine time may not be available to make this material.
