Re: Reverberator & Roaster Flue
Connection to 825 foot Stack

Gentlemen:

We are pleased to quote the total sum of \$9,897.00 to furnish and apply insulation in connection with the above referenced project. Our quotation is based on a complete insulation job as shown on your drawings Number EP 13077 and EP 13078. We will furnish all material, labor, tools, scaffolding, etc. necessary for a complete job as outlined in our proposal.

We propose to tack weld a 13 gauge expanded metal lath to the I-beams forming a continuous surface over the I-beams. Owens-Corning Fiberglas Corp's PF615 Rigid Industrial Insulation, 1½" thick, shall be wired to the lath. A skim coat of insulating cement shall be applied over all insulated surfaces. All insulated surfaces shall be weatherproofed by applying hexagonal wire netting over the insulating cement and then coating the entire surface with asphalt emulsion. This procedure will give a highly efficient insulation job that will last for years.

Applicable state taxes are included in our quotation.

We appreciate very much the opportunity to quote on this project. We hope we may be of service to you.

Respectfully submitted,

WILLARD A. SELLE, INC.
