Attn: Mr. Joe English

Re: Insulation of Baghouse
El Paso Smelter
El Paso, Texas

Gentlemen:

We propose to thermally insulate the above referenced building in the following manner:

Two by four sleepers will be installed horizontally 4' O.C. Holes will be drilled in concrete 4' O.C. horizontally, and lead shields will be inserted. 5/16" x 3-1/2" lag screws will be used to attach sleepers.

Johns-Manville J-X 2" Blanket will be cemented between sleepers using Benjamin Foster 81-66 Adhesive. A pplication of Johns-Manville 1/8" Flexboard will be made over the blanket using 4' x 8' sheets placed with the length running horizontally. All horizontal joints will be installed with aluminum Z flashings. Vertical joints will be calked and a 3" batten strip of 1/8" Flexboard used. Corners will have aluminum flashings, as well as door openings. angle

On the side of building containing a large number of protuberances, we propose to follow the same procedure, with the exeption of the use of Flexboard as an exterior facing. In this area we propose using a 1/4" coat of Johns-Manville Insulkote (approximately 400 square feet).

Total Price.....\$4,650.00

Yours truly,
