To P. L. Fetzer
From J. J. Zimmer
Date August 3, 1979
Subject Regulated Area for East-end of Block I - Support Data

Attached is a table showing the VCM exposure values from four sampling points in Block I. #2, #3, #4 and #5.

This table I, is identical to table II of a letter dated June 14, 1979 except that sampling point #1 is omitted. This was done to possibly reduce the size of the regulated area in Block I.

Monthly averages after omitting point #1 were as follows:

March	1.03 ppm VCM
April	.8344 ppm VCM
May	.95 ppm VCM
June	.926 ppm VCM
