Re: Asbestos Removal from 4 Orlon Dryers at DuPont

Dear Mr. Hoffman:

This office has received a notification of intent to remove approximately 260 LF of asbestos material from Plant II at the DuPont May Plant from Mr. K. C. Lillard of DuPont's environmental staff. The National Emission Standards for Hazardous Air Pollutants (NESHAP) require that notification of intent to remove asbestos must be sent by the company performing the removal. Notification sent by the building owner does not relieve the contractor of providing the notification.

For your information, I have enclosed a copy of the notification form, the currently effective NESHAP regulation and proposed revision to the regulation. There are no differences that I have been able to detect between the existing and proposed regulations except that the proposed regulation is in slightly more clear language.

If you have any questions or if I can be of any assistance, please call me at 758-5406.

Sincerely,

Bob Betterton
