

1 finished up using the videotape and talking about hot
2 spotting, and I am going to try to keep you in your
3 seat for the rest of the direct examination.

4 This morning you mentioned that you had
5 various contacts with the researchers at Mount Sinai
6 in New York; is that right?

7 A That is correct.

8 Q Okay. Now, the jury has heard something
9 about Mount Sinai and the research that was done
10 there.

11 Are you familiar with their research?

12 A The asbestos-related research, a little
13 bit.

14 Q When did you first become familiar with the
15 research done by Mount Sinai?

16 A I believe it was in 1969 from the literature
17 search.

18 Q From the literature search.

19 Who performed that literature search?

20 A From the members of the technical
21 information section of our scientific library, so it
