

Coldbrook, Saint John,
N. B. Canada.

Oct. 12th 1944.

Mr. Robert A. Kehoe,
Ethyl Corporation.

Dear Sir:

Received your letter of Sept. 30th
and I wish to thank you very much for
your information. I would like to know,
if a man was exposed to these gasoline
fumes in a confined place; would it
not produce a heart condition or High-
Blood Pressure? I mean, getting in
which contain gasoline, without the gas
mask. I was told by a safety-first
man, a few years ago; he was from
New Jersey; that even washing your hands
in gasoline could effect your kidneys, as
the skin absorbs it and by this way it
is carried through the system. When the
vapors off gasoline can produce drunkenness
it must effect the system if exposed to
I think there is a
men, handling these products.

warning giving
Yours Truly
Charles E. Bayler
