**Subject:** WEBINAR: Paper to Digital, email archiving and PDF/A

[View in browser](#)

The practice of paper records-keeping will, finally, come to an end, even if that “end” means scanning a pen-signed piece of paper, according to NARA’s newly released draft strategic plan, and PDF/A is a preferred format.

Talk to our experts from Foxit Software, Gert Michiels, Product Management, and Dan Morris, Senior Solutions Architect who will discuss PDF/A in U.S. Government, and how to centralize the conversion of your emails and documents to PDF, PDF/A.

- Scan image file compression and OCR enabling you to make content searchable
- Redaction of sensitive information for compliance and data protection
- Quickly convert emails and attachments from any system to PDF/A for long term archiving

**Webinar date and time:**

Day: Wednesday, 13 Dec  
Time: 10am Pacific time (1pm Eastern time)

**Meet Your Presenters:**

Gert Michiels  
Director of Product  
Management

Dan Morris  
Senior Solutions Architect

DeeDee Kato  
Senior Director of Marketing
