SUBJECT BROWNLINE REVIEW OF PLASTIC & PLASTIC GUN CEMENTS BROCHURE

As requested, an editorial and technical review of this brochure has been made.

On the inside cover "Becket" has been misspelled with two "t's". It should be Welton Becket & Asso.

On the next page (3), the word asbestos has been added in line 29 of the East of Application - General Section. The prior script we reviewed did not contain the word asbestos. Unless it is a legal necessity to do so, now that we mark sacks to indicate the product contains asbestos, I recommend deletion of the word. A lubricating agent, which is what asbestos is, should be descriptive and sufficiently definitive. Technically the statement is inaccurate.-- Permanente Plastic contains asbestos, Cushenbury Plastic does not.

On Page 5, the word asbestos has also been added in Line 12 of the Section Mixing Plastic Cement Plaster. Unless a legal necessity, I recommend the words "asbestos as" be deleted.

Otherwise very good.
