

Mr. C. R. Eckert - Bound Brook

Jan. 19, 1948

Mr. W. G. Cowan

PRECISION MOLDED CALSILITE

I refer to the following:

U. S. Pat. 2,432,981 - December 23, 1947 - S. A. Abrahams,
R. Lewon and A. M. Dinkfeld

concerning which I am writing Mr. Dittenhoefer today, as
per copy attached.

It would certainly pay you and Mr. Gordon to study over
this patent, as it may possibly give you some light on
the "precision molding process", likewise on the formula
which Plant Rubber & Asbestos Works have perfected in
connection therewith.

I am also enclosing, as a matter of interest:

U. S. Pat. No. 2,433,265 - December 23, 1947 - P. S. Denning

which relates to a quick thermo-setting magnesia product
which rapidly sets at a comparatively low temperature.

President
