Dr. Jorge Fernandez Osorio
Director, Occupational Health Unit
Mexican Institute of Social Security
Mexico, D.F.

Dear Jorge:

Thank you for your letter regarding glazed earthenware containing lead. I am sending you four reports on the subject.

As you know, Dr. Kehoe and his staff some years ago were involved in studies of ceramic glazes. I referred your letter to him and he indicates he would be most pleased to write to you about his experiences with such problems. His advice should be very useful to you.

Very best wishes and kind regards.

Very sincerely yours,

Raymond R. Suskind, M. D.
Director
