

[REDACTED]

Meeting between GROW.F1 [REDACTED] and
Cefic [REDACTED] on 25/02/2022

The meeting was organised to discuss a position paper sent by Cefic to GROW.F1 and ENV.B2 on “A proposal for future regulatory risk management of chemicals”.

During the meeting specific points of the position paper were discussed:

- Whether it would be feasible to formalise ECHA’s work under the Integrated Regulatory Strategy;
- The role of a Regulatory Screening List, in the context of the Commission’s thinking on the future of the candidate list;
- How to make the best use of possible additional data collection obligations.

In addition, the role of authorisations/derogations for essential uses in the REACH revision was discussed, building on the workshop paper that was circulated to stakeholders ahead of the workshop on 3 March.

Thank you,
