THIS COPY FOR

Forwarded herewith is a copy of a J-M letter, dated August 15, and an attached sketch, which is self-explanatory. They are asking for a special 5/8" board for sale in the Los Angeles market. We assume it would have to be made at Sigurd, if at all. They are asking for it in a straight carload. There is no indication as to how frequently it would develop and I don't see anything relative to length. Would you please consider this request and then advise me as to what I can reply to J-M, giving any additional qualifications you think are necessary as to length or other matters.
