Subject: RE: EPA Press Inquiry
Attachments: Wambaugh-2014-ExposureHeuristics.pdf

Emma, for attribution to "an EPA spokesperson," please:

EPA cannot confirm the statistic. However, EPA recognizes that in-home exposures are frequently the largest source of exposure to environmental chemicals. That general pattern is supported by the attached 2014 paper.

Regards, R.

Hi Emma, we have your inquiry below. Tricia Lynn, copied here, will be in touch with the agency's response.

Thanks,

Enesta
