

RESUME

R. N. WHEELER, JR.

2611 Putter's Lane
Melbourne, Florida 23901
Telephone (305) 727-7258

Graduate Chemical Engineer from Virginia Polytechnic Institute in 1943.
Employed by Union Carbide Corporation in various capacities for over forty-two years.

Career

1943 Gas Analyst

Rubber Reserve Company Butadiene-Styrene Plant at Institute, West Virginia operated by Union Carbide Corporation.

Quality control and special analytical projects involving process stream and vent sampling, sample fractionation and absorption spectroscopy of organic gases.

1944 Technical Assistant

Rubber Reserve Company Butadiene-Styrene Plant at Institute, West Virginia.

Production supervisor and technical project work in a styrene monomer plant. Operations involved liquid phase alkylation, liquid phase oxidation, liquid phase hydrogenation, vapor phase dehydration, gas separation and distillation.

1945 Technical Assistant

Union Carbide Corporation plant at South Charleston, West Virginia.

Production supervision and technical project work in solvent polymerization of vinyl chloride and vinyl acetate. Operations involved polymerization monomer recovery, solvent recovery and process development.

Career

1947 Production Supervisor

Union Carbide Corporation plant at South Charleston, West Virginia.

Production supervision and technical project work in the solvent polymerization of vinyl chloride and vinyl acetate. Initiated production of vinyl alcohol terpolymer resins.

1952 Production Department Head

Union Carbide Corporation plant in South Charleston, West Virginia.

Responsible charge of production facilities and personnel in the solvent vinyl resin plant. Converted the plant from batch to continuous operation. Initiated production of vinyl alkyl ether polymers.

1958 Production Department Head at-Large

Union Carbide Corporation plant at South Charleston, West Virginia.

Engineering design project, new process evaluation and business, and economic analysis.

1959 Area Supervisor

Union Carbide Corporation plant at South Charleston, West Virginia.

Responsible charge of facilities and personnel by the manufacture of solution vinyl chloride resins, vinyl alkyl ether resins, polyethylene oxide, and vinyl acetate resins and latexes.

1965 Area Superintendent

Union Carbide Corporation plant at South Charleston, West Virginia.

Responsible charge of facilities and personnel for the manufacture of vinyl chloride monomer, solution vinyl chloride resins, vinyl acetate resins, dispersion vinyl chloride resins, and vinyl alkyl ether resins. Union Carbide Corporation representative to MCA for planning and coordinating the acro-osteolysis epidemiological study.

1968 Production Manager for Vinyl Resins

Union Carbide Corporation plants at South Charleston, West Virginia and Texas City, Texas.

Responsible for manufacture of suspension PVC, bulk PVC, and dispersion PVC resins. The assignment was later revised to dispersion PVC resins, vinyl acetate resins and vinyl alkyl ether resins.

Continued work on MCA's acro-osteolysis epidemiological study.

Career

- 1971 Technical Superintendent for Vinyl Resins
Union Carbide Corporation plant at South Charleston, West Virginia.

Special projects and problems for the plant and for the vinyl resins Operations Teams including business planning and analysis, customer service, occupational health and governmental regulations. Served as Chairman of the MCA Ad Hoc Vinyl Chloride Committee while the research program was organized, planned and funded.
- 1978 Project Manager for Environmental Protection and Occupational Health
Union Carbide Corporation Chemicals and Plastics Division, SHARE Group (Safety, Health and Environment).

Responsible for projects related to occupational health, environmental protection and governmental regulations.
- 1980 Assistant Director of Product Safety
Union Carbide Corporation Health, Safety and Environmental Affairs Group.

Coordinate and plan activities within Union Carbide Corporation to further product safety concepts and objectives with particular reference to trade organizations, governmental regulations and product liability.
- 1985 Retired

ORGANIZATION ACTIVITIES

- I. Organization Resources Counselors
Washington, D.C.
 - 1. Vinyl Chloride Task Force
 - 2. PVC Fabricating Industry, Epidemiology Steering Committee
- II. Society of Plastics Industries VC-PVC Producers Association
New York, New York
 - 1. VCM-PVC EPA Technical Committee
 - 2. Health Study Committee
- III. Manufacturing Chemists Association
Washington, D.C.
 - 1. Vinyl Chloride Technical Committee
 - a. VCM Research Program Coordination
 - b. VCM Safety Data Sheet Subcommittee
 - 2. Styrene Toxicity Technical Panel
- IV. Society of the Plastics Industry
New York, New York
 - 1. Acrylonitrile Copolymer Group
 - 2. Toxicology Committee
 - a. Vinyls Subcommittee
 - b. Vinyl Acetate Study Task Force
 - 3. Ad hoc Committee on Ethylene Dichloride
 - 4. Ad hoc Committee on Epichlorohydrin
- V. Organization Resources Counselors
Washington, D.C.
 - 1. Acrylonitrile Task Force
 - 2. OSHA Generic Carcinogen Proposal Task Force
