Dr. Robert A. Kehoe  
Kettering Laboratory of Applied Physiology  
University of Cincinnati  
Cincinnati 19, O.

Dear Dr. Kehoe:

I appreciate your most interesting letter of August 20 which answers my question adequately. The inquiry was simply a "fishing expedition" on the chance that there might be a good story to tell. And I suspect that you could give some interesting tales. We will reserve these for the informal get-togethers at the meeting, however, rather than a formal platform presentation! In view of your statement I see no point in pursuing the subject further with Meiter.

I can well imagine that you are deluged with work. May the pace slow down for all of us, now that the shooting has stopped.

With kind regards,

Sincerely yours,

  
John F. McMahon
