Speakers include:

Laura Lightbody, project director, Pew Charitable Trusts

Dr. Judsen Bruzgel, senior manager, ICF  
Jonathan E. Westcott, civil/coastal engineer, FEMA Building Science Branch

This webinar explores the flood risks that public schools across the country face. Pew's flood-prepared communities' initiative and research partner ICF examined U.S. public school data to develop a county-level flood-risk score for schools in all 50 states. Pew also analyzed the factors that influence a school's flood risk, how this differs across regions and what policymakers can do to help reduce this risk to their schools.
