

INSPECTION REPORT

Inspection Entry Date/Time	6/6/2024 3:35 PM (CT)	Announced: No		
Inspection Exit Date/Time	6/6/2024 4:50 PM (CT)	Access: Granted		
Regulatory Program	RCRA			
Type of Inspection	Focused Compliance Inspection (FCI)			
Facility or Site Name	Anadarko Petroleum Company, a wholly owned subsidiary of Occidental			
Facility/Site Identifier	LAR000101702			
Facility/Site Physical Address	106 9 th St, C-Port 1, Slip 6			
City, State, Zip Code	Golden Meadow, LA 70357			
County/Borough	Lafourche Parish			
Generator Status	Small Quantity Generator			
NAICS	211130			
Type of Operation	Anadarko Petroleum Company, a wholly owned subsidiary of Occidental, is a tenant of C-Port , LLC (CP). The company operates a waste storage area at Slip 6 managing the wastes generated offshore by its drill ships and production platforms.			
Geographic Coordinates	29.129525, -90.215618			
Additional Persons Participating in Inspection:				
Name	Title	Organization	Email	Phone
Joyce Johnson	Inspector	EPA REGION 6	Johnson.Joyce-r6@epa.gov	(214) 665-8548
Dedriel Gardner	Inspector	EPA REGION 6	Gardner.Dedriel@epa.gov	(281) 983-2133

Lead Inspector:				
Vince Damiano				
	ERG		Vince.Damiano@erg.com	(703) 835-6281

SECTION I – INTRODUCTION**Site Entry and Purpose of the Inspection**

Type of inspection: Focused Compliance Inspection (FCI)

Port Fourchon and surrounding facilities were selected for inspection based on an Environmental Justice and Regional initiative to evaluate facilities at ports receiving or transporting Resource Conservation and Recovery Act (RCRA)-regulated hazardous wastes, and/or maintaining an International Convention for the Prevention of Pollution from Ships (MARPOL) Annex V Certificate of Adequacy (COA) issued by the U.S. Coast Guard (USCG).

This report is based on information supplied by the facility representatives, inspector observations, port related facilities, and records including verbal or written statements made during or after the on-site inspection, and materials shown, demonstrated, or submitted to the EPA during or after the on-site inspection. In addition, information gathered prior to or after the inspection from a review of EPA, State, and public records may be included in this report.

Attendees

Facility General Description

Tenant/Area	Inspection Date	Process Description	Areas of Concern
Anadarko Petroleum Company, a wholly owned subsidiary of Occidental	06/06/24	Anadarko Petroleum Company, a wholly owned subsidiary of Occidental (Anadarko) transfers materials on and off the vessels that supply its offshore drill ships and production platforms and is a tenant of C-Port, LLC. Exploration and production (E&P), non-hazardous, universal, and hazardous waste, as well as used oil, are generated offshore and transported to Anadarko's waste storage area at C-Port Slip #6. From there, the waste is sent offsite for final disposal. All hazardous waste is characterized and profiled before being brought to shore, and the company's offshore facilities are designated as the generators of the waste. Once offloaded at CP, Anadarko then signs the hazardous waste manifests as Transporter #2 and manages the waste at its 10-day hazardous waste transfer facility. Anadarko is a small quantity generator (SQG) of hazardous waste and does not maintain a MARPOL COA.	Yes

SECTION II – OBSERVATIONS

Tenant: Heritage Environmental Services, LLC – TS Golden Meadow			
Section: 2.1	Date: 6/6/2024, 3:35 P.M.	Contains AOC: Yes	Contains CBI: No
Lead Inspector: Vince Damiano	Attendees: Jake Pellegrin (HSE), Kyle Frazier (HSE), Sara Carlson (HSE)		
Anadarko is a tenant of C-Port, LLC and operates a waste storage area at Slip 6 managing the waste generated offshore by the company’s drill ships and production platforms. The facility also serves as a temporary storage location for equipment, groceries, and chemical products being sent offshore. Anadarko receives hazardous waste, non-hazardous waste, universal waste, E&P waste, and used oil at Slip 6. For hazardous waste being received, the offshore facilities generating the waste are the generators and are responsible for making waste determinations. The waste is then profiled prior to being sent to shore. The hazardous waste is transported to shore by third party companies that sign the manifests as Transporter #1. Anadarko then signs the manifests and manages the waste at its facility as Transporter #2. Waste is then shipped offsite to various disposal facilities. Anadarko is registered as an SQG and hazardous waste transfer facility (LAR000101702); however, it is not registered with EPA as a transfer facility for used oil. Ms. Carlson stated that used oil is shipped offsite within 24 hours of receipt. All hazardous waste received from offshore is shipped offsite within the 10-day time limit. Hazardous waste generated by Anadarko onsite includes paint waste and off-spec chemicals. Facility personnel stated that hazardous waste is also occasionally generated onsite as a result of spills. Anadarko is responsible for sampling and profiling the waste generated onsite. The facility does not generate any used oil from maintenance activities. Anadarko does not receive waste from any third parties and does not maintain a MARPOL COA. Following the opening conference, the inspection team conducted a brief review of Anadarko’s electronic waste inventory. The inspection team observed that the following shipments of used oil had been received from offshore and held onsite for longer than 24 hours, making Anadarko subject to the used oil transfer facility requirements: ○ 17-Dec-53, Received on 04/18/24 and shipped off-site on 05/01/2024 ○ 3059, Received on 04/21/24 and shipped off-site on 04/26/2024 ○ 3060, Received on 04/21/24 and shipped off-site on 04/25/2024 ○ 18901, Received on 05/27/24 and shipped off-site on 06/03/2024 ○ 19700, Received on 05/27/24 and shipped off-site on 06/04/2024 ○ 19707, Received on 04/19/24 and shipped off-site on 05/09/2024 ○ 19708, Received on 04/19/24 and shipped off-site on 04/29/2024 ○ 319961, Received on 04/22/24 and shipped off-site on 05/01/2024 [AOC #1: <i>Anadarko did not notify EPA that it was acting as a used oil transfer facility – 40 CFR 279.42(a)].</i> After reviewing Anadarko’s electronic waste inventory, the inspection team conducted a visual inspection of the facility’s waste storage area. Observations and areas of concern (AOCs) are listed below. • No waste was being stored in the area designated as Anadarko’s 10-day hazardous waste transfer facility (see Appendix 1 – Photos 1 and 4). • There were two 5-gallon buckets of spill cleanup material labeled as hazardous waste being stored in the area designated for waste generated onsite. Both buckets were properly labeled (see Appendix 1 – Photos 5 and 6). • There was a steel tote labeled as “Used Oil” being stored outside the waste storage area in Slip 6. After the inspection, facility personnel confirmed via email that the steel tote was empty and being sent offshore for use (see Appendix 1 – Photos 7 and 10).			

- The waste storage area was not equipped with a secondary containment system [**AOC #2:** *Anadarko stored used oil for longer than 24 hours at its waste storage area, which is not equipped with a secondary containment system - 40 CFR 279.45(d)*].
- At the time of the inspection, it was unclear how Anadarko ensured used oil being received onsite was not a hazardous waste under the rebuttal presumption [**AOC #3:** *Anadarko stored used oil for longer than 24 hours at its waste storage area and therefore must determine whether the total halogen content of used oil stored at the facility is above or below 1,000 ppm- 40 CFR 279.44(a)*].

After the visual inspection, the inspection team requested the following information from Anadarko:

- The facility's 2024 waste inventory (see Appendix 2).
- The hazardous waste manifests for waste sent offsite on Mondays and Fridays in December 2023 and May 2024 (see Appendix 3).
- The manifests for the used oil shipments identified as being onsite longer than 24 hours (see Appendix 4)
- Any responses to the AOCs identified during the visual inspection (see Appendix 5).

The inspection team did not observe any other apparent AOCs at the time of the inspection. A closing conference was conducted at approximately 4:45 PM with Anadarko personnel. The AOCs were communicated to Anadarko during the closing conference; however, further EPA review may change or add to their potential AOCs.

SECTION III – RECORDS REVIEW

No RCRA regulated records were reviewed during this focused onsite inspection besides those mentioned in Section II.

SECTION IV – AREA OF CONCERN

The presentation of AOCs does not constitute a formal compliance determination or violation.

Tenant: Anadarko Petroleum Company, a wholly owned subsidiary of Occidental		
AOC #1 – Anadarko did not notify EPA that it was acting as a used oil transfer facility	Citation: 40 CFR 279.42(a)	Section: 2.1
AOC #2 – Anadarko stored used oil for longer than 24 hours at its waste storage area, which is not equipped with a secondary containment system	Citation: 40 CFR 279.45(d)	Section: 2.1
AOC #3 – Anadarko stored used oil for longer than 24 hours at its waste storage area and therefore must determine whether the total halogen content of used oil stored at the facility is above or below 1,000 ppm	Citation: 40 CFR 279.44(a)	Section: 2.1

SECTION V –FOLLOW UP

Documents or files provided by the facility were transmitted via a file transfer protocol (FTP) link provided by ERG following the inspection.

Communication Log

After the inspection, additional information was emailed to EPA including:

1. 6/20/2024 Anadarko email – Sara Carlson provided notification that the waste inventory, hazardous waste and used oil manifests, and follow-up to the AOCs identified during the inspection had been uploaded to the FTP site.

SECTION VI – LIST OF APPENDICES

- Appendix 1 - Photograph Log
- Appendix 2 Anadarko Waste Inventory
- Appendix 3 Anadarko Hazardous Waste Manifests
- Appendix 4 Anadarko Non-Hazardous Waste Manifests
- Appendix 5 Anadarko Response to AOCs

Appendix 5
Anadarko Response to AOCs

The following is an excerpt from an email sent by Vince Damiano on 06/06/2024 and responses in red.

- Hazardous waste manifests from **Mondays and Fridays for May 2024 and December 2023.** – **Haz Waste Zip Folder**
- Non-Hazardous manifest #'s – **Non-Hazardous Waste Zip Folder**
 - o 17-Dec-53
 - o 19708
 - o 19707
 - o 3059
 - o 3060
 - o 319961
 - o 19700
 - o 18901
- Inventory log spreadsheets from 2024 for Hazardous Waste, Non-Hazardous Waste, and Contractor waste. – **2024 Hazardous Waste, 2024 – Non-Hazardous Waste, 2024 – Contractor Waste pdfs**
- Follow-up on contents and information on steel tote labeled "For Used Oil" found during inspection – **Used Oil Tote – Empty to go Offshore**

Initial Areas of Concern. You may follow-up with pictures, write-ups, or however you see fit.

- No secondary containment for storing used oil as a transporter. **The used oil tank that was noted during the inspection was an empty used oil tank in a staging area to go offshore as reflected on the attached.**
- Follow-up on testing methods used for used oil regarding 40 CFR 279.44. **Knowledge is used to determine this based on the oil used in the engines. The oil has not been mixed with any additives or any other fluids during servicing.**
