April 7th, 1964

Mr. Frank S. Bilton
Foseco, Inc.
P.O. Box 8728
Cleveland 35, Ohio

Dear Mr. Bilton:

Following our recent conversation in Cleveland, I passed word on to our associates in England of the questions and health problems you had raised in connection with the use of Blue asbestos.

I have word back from Dr. Richard Gaze, who is a director of Cape Asbestos Company Limited, London, and chief scientific advisor to the company. I enclose herewith a copy of Dr. Gaze's letter, and apparently the information contained in this letter has already been passed to your associates in the U. K.

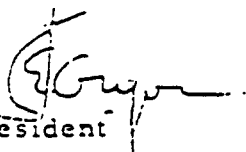

I advised Dr. Gaze that Mr. Jago is currently in England, but whether Dr. Gaze and Mr. Jago will be in touch with one another, as you will note, is not indicated in this letter. Mr. Jago, however, is no doubt in possession of this information through Foseco Ltd.

We shall be interested in your comments and those of Mr. Jago on his return, but meanwhile, please let me know if there is any additional information that you think we may be able to supply.

With all good wishes,

Sincerely yours,

NORTH AMERICAN ASBESTOS CORPORATION
