Mr. Al Galioto
Employee Relations Supt. Fab.
Kaiser Aluminum & Chemical Corp.
Ravenswood, WV 26164

Dear Mr. Galioto:

There is evidence that exposure to asbestos dust substantially increases the risk of asbestosis, and certain cancers in workers with jobs in or near asbestos contaminated areas.

By jointly recognizing these areas, the joint safety and health committees will be permitted to work more knowledgeably in creating a more healthful workplace.

Therefore, the Local Union is requesting that the Company make available a complete evaluation of all areas in which asbestos is used in any form.

Sincerely,

Dan Stidham

Dan Stidham, Chairman
Fab. Safety Committee
