Mr. George Barlo
Monumental Adhesives Company
614-616 Light Street
Baltimore 30, Maryland

Dear Mr. Barlo:

Triphenyl Phosphate and Santolite MHP are included in the adhesives food additives order that appeared in the September 12 Federal Register. It would appear, therefore, that these can be used according to good manufacturing practices in any adhesive.

Aroclor 1242 was not included and until its status has been cleared, it cannot be used. We are trying to clarify this latter situation.

Very truly yours,

R. Emmet Kelly, M. D.
Medical Director
