CYWI 3-001003

Gentlemen:

The time to take action is now

In March 1981 all employees with blood leads ~~at~~ at 60 or above must be removed from their jobs and cannot return until two consecutive tests are below 40

at this time we would lose 3 men. [REDACTED] The plant cannot operate under these conditions

Please ask yourself

1. Why is [REDACTED] the only foreman above 50
2. Why is [REDACTED] the only L.O. above 50
3. Why is [REDACTED] at 61 - other P.O.'s at 26 & 45
4. Why are the blends: Paches so high
5. Why is the 4-12 shift averaging so much above the night-day shifts

We must bring all people well below 50.
