B3NC P. Stordeur - Louvain-La-Neuve

Mr. Ennet of Skanska Cimic, Sweden, called 1/11/73 to discuss Aroclor replacements for polysulfide sealants in "Twindow" and light construction applications. S-278/Cereclor S52 (2:1) was recommended for Twindow applications. S-261 or S-160 with chlorinated paraffin was suggested for outdoor use. It was emphasized that benzyl phthalates in conjunction with chlorinated paraffins can reduce the shelf stability problems normally associated with chlorinated paraffins.

We believe Mr. Ennet would appreciate further contact.

A. W. Morgan
