FILE NAME: International Harvester (INTH)

DATE: 0000

DOC#: INTH001

DOCUMENT DESCRIPTION: List of Knowledge Documents from INTH

International Harvester Knowledge & Memberships
Knowledge Documents

1932 Wisconsin Industrial Commission Dr. J.A. Britton, Medical Director International Harvester, Chicago, IL, attends.

1936 Illinois Workers Comp Statute recognizes asbestos as compensable disease. (Illinois Manufacturers Association Member)

American Foundrymen's Association

1939 "What Price Industrial Hygiene" (FDY 084)
by James R. Allen International Harvester, Chairman Industrial Hygiene Codes Committee

1941 AFA Grinding, Polishing, and Buffing Equipment Sanitaiton Code is American Standard (FDY 093)
Chairman, James R. Allen International Harvester

1943 AFA Code of Recommended Practices for Housekeeping and Sanitation (FDY 099)
Chairman, James R. Allen International Harvester
S. B. Hansen, International Harvester, member

1953 Symposium on Health and Safety,
Chairman, James R. Allen International Harvester (TPI 000332)
J.W. Young, Safety Director International Harvester, member

1956 Engineering Manual for Control of In-Plaint Environment
Special thanks to International Harvester
Vice-Chairman F.C. Fleugge, Industrial Engineering and Construction Dept. International Harvester
JohnW. Young, Safety Director International Harvester, member

1957 Recommended Safety Practices for the protection of Foundry Workers ,
John Young, Safety Consultant International Harvester, chairman, (P.iv)
Dr. Eugene Walsh, Medical Director, International Harvester, Medical Advisor (P. Iv)

Tentative Code for Grinding and Polishing (TPI 000331) Chairman, James R. Allen International Harvester

ASME Multiple memberships (See ASME liability outline for knowledge documents)

American Petroleum Institute 1950-1974 member (See API Liability Outline for knowledge documents)

National Safety Council - Charter member (See NSC outline for knowledge documents)
National Safety News, February 1948 ***Fume and Dust Exposures*** by V. J. Castrop,
"Asbestos"
"Asbestos used in the formulation of brake lining is a potentially harmful

compound. This material is the offending agent in the production of the lung ailment known as asbestosis. The harmful effect is comparable to that silica and a permissible limit of 5,000,000 particles of asbestos dust per cubic foot of air is generally recognized."

"Dust exposures to asbestos and other ingredients of the brake lining exist when the dry materials are handled and emptied into the mixers and in the subsequent operations of slitting, grinding, or surfacing. ... Local exhaust systems with properly designed hoods or enclosures are used to remove the dust from these operations." - Page 79
