

DR. ARMSTRONG

William J. McConnell, M.D., Assistant Medical Director April 15,
Director of the Industrial Health Bureau - 1949

William J. McConnell, M.D. is an outstanding authority in the field of Industrial Health. He was graduated from the St. Louis School of Medicine in 1914. After serving his internship at the Allegheny General Hospital, he joined the Army Medical Corps and served as a first lieutenant on the Mexican border for more than a year. When the United States entered World War I he served in France with the A.E.F., progressing to the rank of major.

After the Armistice, he entered the United States Public Health Service and later became surgeon of the United States Bureau of Mines. Prior to joining the Metropolitan he served as Medical Director of several industrial and health organizations, such as the Philadelphia Health Council and Tuberculosis Committee in 1925, where he conducted a demonstration of a plan giving adequate medical services to groups of small industrial plants. This plan is still in operation. He was Medical Director of the General Electric Company, Philadelphia (1926-27); and the Budd Mfg. Co. and the Budd Wheel Co., Detroit, (1927-29).

Dr. McConnell was appointed to Company service in 1929 and was associated with the Policyholders' Service Bureau during the early years of his service in the capacity of industrial hygienist and was appointed Assistant Medical Director in 1930. In 1933 the Industrial Health and Safety Bureaus were transferred to the Health and Welfare Division.

From 1940 to 1942 Dr. McConnell was loaned part-time as Consultant to the Industrial Hygiene Division of the United States Public Health Service for the purpose of directing a nationwide study of medical services in industry. He was again called to active service in the Medical Corps of the Army in 1942 and served for four years, attaining the rank of colonel. In 1945 he was awarded the Legion of Merit for his work as Chief of the Ordnance Division where he was responsible for directing the industrial hygiene program.

MEET-301

PLAINTIFF'S EXHIBIT

Dr. McConnell is the author of many articles on various industrial health activities, and did original research work at the Bureau of Mines on the physiological effects of high temperatures and humidities and on other problems in the field of ventilation. For several years he has been the author of sections in internationally known textbooks of medicine and industrial hygiene, and has contributed and continues to contribute numerous articles on industrial medicine and hygiene to current medical and industrial journals. In addition to membership and work in many medical and industrial hygiene groups, Dr. McConnell is consultant to the Industrial Hygiene Division, United States Public Health Service, and to the Office of the Surgeon General, United States Army.

Dr. McConnell directs the activities of the Industrial Hygiene Laboratory and the Industrial Health Bureau of the Health and Welfare Division in meeting the needs for industrial hygiene service in larger industries in the country, including steel production, mining, the manufacture of electrical equipment, particularly among insured Groups. He and his staff furnish guidance on ventilation, sanitation, and a wide variety of matters having to do with the health of the worker and the prevention of lost time through illness and accident. He is frequently consulted by the various Divisions of the Home Office in matters pertaining to his field.

Dr. McConnell taught industrial hygiene at the University of Pittsburgh Medical School during his assignment at the Bureau of Mines. During the past 10 years Dr. McConnell has been a lecturer at New York University on Industrial Hygiene.

RECEIVED - MAY 15 1949

William J. McConnell, M.D., Assistant Medical Director *April 15,*
