# CONSTRUCTION PRODUCTS DIVISION

W. R. GRACE & CO., 62 WHITTEMORE AVENUE, CAMBRIDGE, MASSACHUSETTS 02140, 617 876 1400

January 21, 1971

Mr. B. G. Anderson, Assistant Vice President
Engineering
Burlington-Northern
176 East 5th Street
St. Paul, Minnesota 55101

REFERENCE: Zonolite Siding
Libby, Montana

Dear Mr. Anderson:

To comply with Air Pollution Control Regulations in the state of Montana, the Construction Products Division of W. R. Grace & Co. is proposing additional dust control facilities at its river load out station, located in Libby, Montana. This property, or right of way, is owned by the Burlington-Northern and leased to W. R. Grace & Co. I believe the lease description of this property is known as Zonolite Siding.

Referring to the enclosed drawings, new control facilities will be added to the west side of the existing structure and will be no closer to the track center line than existing structure.

Due to an oversight on my part, initial construction on this project was started before receiving prior approval from the Burlington-Northern. So that we may proceed on schedule, and be in full compliance with Montana Pollution Control Regulations, I would appreciate your approval as soon as possible.

Very truly yours,

FREDERICK W. EATON
Project Engineer
