Ketterling Laboratories
University of Cincinnati
Cincinnati, Ohio

Gentlemen:

We are operating a lead smelting plant containing both a blast furnace and reverb furnace.

In order to check our employees, the Commonwealth of Pennsylvania recommends that we have lead Dithiazone tests conducted on urine.

During a recent conversation with Dr. Jan Lieben, he stated that it may be possible to have this test work conducted at your Laboratory.

Will you please advise whether we can conduct these tests and the approximate cost. Normally, we would have approximately six to nine samples to be sent to you per month. Samples would be submitted in one quart bottles of polyethylene.

Very truly yours,

PRICE BATTERY CORPORATION
