

A-c Magnetic Across-the-Line Starters (Continued).

Typical Wiring Diagrams.

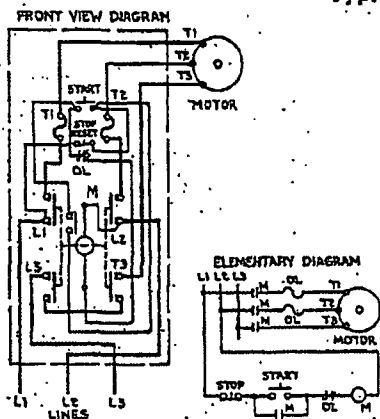

FIGURE 1
Size 1 and 2 non-reversing starters providing overload and low voltage protection, with local "start-stop" control.

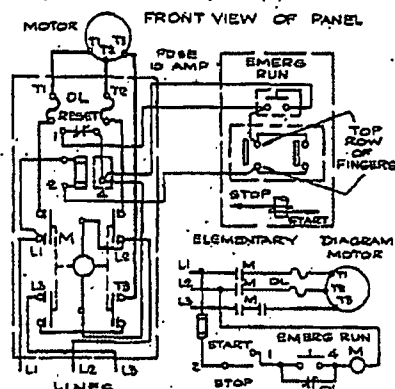

FIGURE 2
Size 1 and 2 non-reversing starters providing overload protection and low voltage release with remote master station, including emergency run feature.

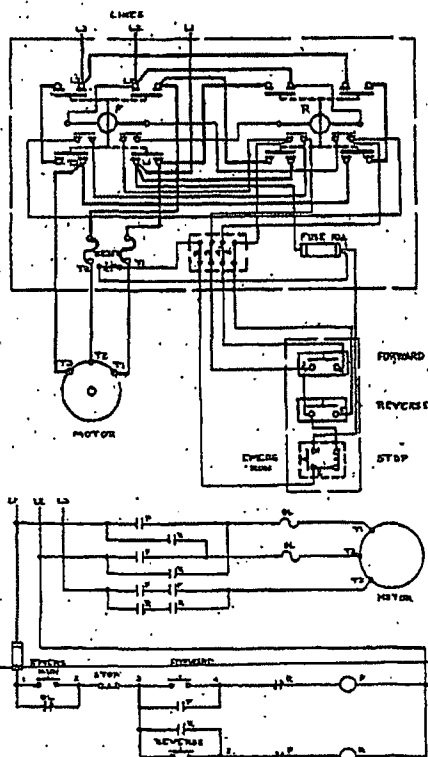

FIGURE 3
Size 1 and 2 reversing controllers providing overload and low voltage protection with remote master station, including emergency run.

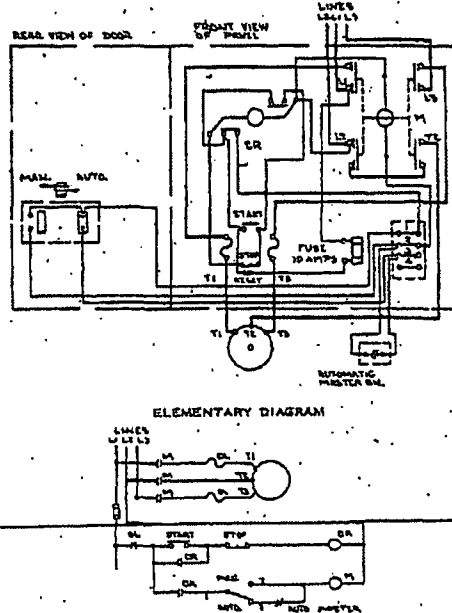

FIGURE 4
Size 1 and 2 non-reversing starters with control relay providing overload and low voltage protection, with local master station and remote automatic pilot master switch.
