MEMORANDUM

TO: Mr. U. W. Smith
Cork, Asbestos & Fibrous Glass Division

FROM: A. B. Tatistcheff

SUBJECT: Asbestos

I am attaching copy of a memorandum from the British with respect to the substitution of other Rhodesian chrysotile grades for C & U grades and would appreciate an answering memorandum from you to me which I can pass on to the British.

With respect to the third paragraph of the British memorandum, this question has been answered, as you know, for it arose in connection with my misunderstanding of the statement contained in the fourth paragraph of Mr. Meloy's memorandum to me on July 1, 1943, so that this particular point has been cleared up.
