The following is a status report on the above subject.

The "Caution" label hand stamps have been received at the four Joint Treatment Product manufacturing plants. The hand stamps were put into active use at these plants as follows:

Baltimore, Maryland on Friday, August 4
 Long Beach, California on Monday, July 31
 Matteson, Illinois on Monday, August 14
 Westwego, Louisiana on Wednesday, August 2

The "Caution" label hand stamps were also supplied to Hamilton Materials, Inc., Orange, California. Mr. Fred Baca indicated in a letter dated August 9 to C. W. Keyser that the hand stamps would be put into active use on August 10. Further, Mr. Baca indicates that on all future order of multiwall bags purchased for our account the "Caution" label will be printed on the bags the same as is obtained with the hand stamp. For your information the products involved are Spray Quick, Spray Quick A and Wall Spray.

The printing of multiwall bags for Vinyl Joint Compound, Vinyl Topping Compound and Vinyl Triple-T Compound has been completely revised and the Asbestos "Caution" label incorporated in the copy. The multiwall bags for these three products have been supplied or are available to supply the Baltimore, Matteson and Westwego Plants at this time.

The revision of multiwall bag printing for Sta-Smooth Compound is currently being revised and for the new QW Compound is in process. On both of these items the Asbestos "Caution" label has been incorporated into the printed copy.

During the interim period required to obtain revised copy and artwork for printing multiwall bags for the Joint Treatment Products we will print the Asbestos "Caution" label reproducing the hand stamp whenever it is necessary to supply one or more manufacturing locations.
