REPORT OF X-RAYS ON ASBESTOS FOLLOW-UP CASES
Your letter to BWK 6-26-81

Dr. Allen was informed of your concern about follow-up x-ray interpretations in those cases where a previous interpretation suggested a possible asbestos-related abnormality. I believe this will be addressed in future readings.

It would be helpful to send all of your follow-up asbestos-related cases to Dr. Allen in the Medical Division for interpretation.

If there are questions, please contact me.

MEDICAL DIVISION

J. C. Bonnett, M.D.
Asst. Medical Director
