Y

SERIES Y COMBINATION GAS AND OIL BURNER

The John Zink Series Y Combination Gas and Oil Burner is particularly designed for boilers and process furnaces where maximum heat release at low excess air and high heat density place a premium on reliable burner performance at low first cost.

VR

SERIES VR VERTICAL GAS BURNER

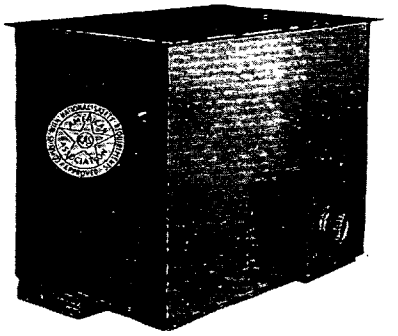

This burner is of the "upshot" or vertical radiant type with multiple burner heads so designed as to entrain a certain amount of primary air from the total air entering through the louvre. The "VR" burners are especially designed to operate in boilers having low draft and small combustion space.
