1982 VCM Safety Association
Meeting

Mr. H. Rzempoluch
Pantasote Incorporated
State Route 62 North
Pt. Pleasant, W. Virginia 25550

Dear Henry:

Following our pleasant and useful meeting in Toronto, I enclose:

1. Copies of the suggestions from Mr. J.A. King.
2. A copy of a new questionnaire on chloride stress cracking, which you may wish to include in your next mailing to the membership.
3. Copies of my suggestions which we discussed.

It appears that Esso Chemical will be able to provide a discussion leader on safe practices for constructing major extensions to an operating plant. A discussion leader for overfill prevention by level detection may also be possible but is not confirmed yet. If you wish to discuss this during my absence (until July 12th), please call John Thorpe - Operations Manager at (519) 339-2751.

I am prepared to handle the Chloride Stress Cracking Survey, present some experimental data and lead the discussion.

Looking forward to seeing your proposed agenda.

Yours very truly,

J.R. Wallace
